### **503.05. Conditions and General Considerations on Issuance of Site Plan Approval.**

The Site Plan submitted for such development as defined in this Section shall provide that the proposed lot sizes, lot coverage, density, setback provisions and other factors are in conformity with the requirements of this Chapter and other applicable Ordinances and laws. In addition to such general considerations, said Plan shall be approved only after a consideration of the following factors:

- 503.05.01 Ingress and egress to the property and proposed structures thereon, with particular reference to automotive and pedestrian safety, traffic flow and control, provision of services and servicing for utilities, and access in case of fire or catastrophe.
- 503.05.02 Manner of drainage on the property, with reference to the effect of provisions for drainage on adjacent properties and the consequence of such drainage on overall City capacities.
- 503.05.03 Conditions on ownership, control and use generally, and conditions on ownership, control, use, and maintenance of open space or common lands to insure preservation of such lands for their intended purposes.
- 503.05.04 All utility connections shall be indicated and shall be in conformity with the standards and requirements for connection to utility companies proposed to serve the property whether said utility companies are public or private.
- 503.05.05 Off-street parking and loading areas, with attention to automotive and pedestrian safety, traffic flow and control, access in case of fire and catastrophe, and screening and landscaping.
- 503.05.06 Recreation and open spaces, with attention to the location, size, and development of the areas as to adequacy, effect on privacy of adjacent and nearby properties, and relationship to community-wide open spaces and recreation facilities.

- 503.05.07 Density and/or purpose of the development, with attention to its relationship to adjacent and nearby properties.
- 503.05.08 General site arrangement, amenities, and convenience, with particular reference to ensuring that appearance and general lay-out of the proposed development will be compatible and harmonious with properties in the general area and will not be so at variance with other development in the area as to cause a substantial depreciation of such property values.
- 503.05.09 All setbacks, parking areas and accessory structures shall be so landscaped, located and constructed so as not to interfere with the use of the surrounding property.
- 503.05.10 Buffer Zones - Whenever the proposed development is to be on land zoned for commercial or industrial use and is adjacent to any property zoned residential or when the proposed development is on land zoned R-3 or R-4 and is adjacent to property zoned R-1 or R-2, unless the development is single-family residential (other than a mobile home park or subdivision), a buffer between the properties shall be provided as follows:
- (1) Landscape. Plans shall be submitted to show how a buffer strip averaging twenty (20) feet in width will be landscaped and maintained. This area shall have as a minimum grass or ground cover. A greater density of landscaping may be required to reduce site, noise, and pedestrian intrusion into residential areas. Earthen berms landscaped with shrubs may be permitted to achieve this requirement.
  - (2) Wall or fence. A six (6) foot masonry wall or a fence of approved wood of natural decay resistance may be built in place of ten (10) feet of the twenty (20) foot buffer strip as outlined in subparagraph 10(a) above.
  - (3) Landscaping and wall or fence. The Site Plan Review Committee and the Inspection Department may require a masonry wall or fence and the twenty (20) foot buffer strip (as outlined in paragraph (1) above) if, in their opinion, it is necessary to protect the residential zone due to an intense use of the property by commercial or industrial occupancies or by the very nature of the proposed development.
  - (4) When a development is so small in scope that the buffer would present a hardship, the Site Plan Review Committee and the Inspection Department may require only a wall or fence as described in (2) above without any additional buffer, or may waive the buffer requirement.

## **SECTION 505. LEONTYNE PRICE OVERLAY DISTRICT**

### **505.01. Purpose and Intent.**

- 505.01.01     Findings:

The purpose of this overlay district is to encourage regional commercial development along Leontyne Price Boulevard from Interstate 59 to Mason Street. This area is intended to entice interstate travelers to exit at Leontyne Price Blvd. and enjoy the City of Laurel. Development style will feature warehouse buildings set apart from neighborhoods large setbacks from the road with parking in the front, rear or shared between adjacent uses as described in the Laurel Mississippi, 2035 Comprehensive Plan. Industrial uses and outdoor storage are contrary to the intent of this district. Buildings in this district are expected to be diverse in size, shape and orientation of property. This District replaces the former Jefferson District most of which was absorbed into the expanded r-o-w of Interstate 59.

505.01.02

Purpose and Intent:

The provisions of this part are based on the following findings:

1. This area is underdeveloped with outdated building stock and is ripe for regional commercial redevelopment.
2. Establishing the Leontyne Price Overlay gives Laurel the opportunity to establish the district as an attractive, commercial entrance corridor into the city.

505.01.03

Since the reconfiguration of the exit ramp of Interstate 59 and Beacon St, now Leontyne Price Blvd., the overlay area has the potential to grow into a significant regional commercial district. This district to be the most intense commercial district, with customers arriving from the interstate. Additionally, this district is the entrance gateway for visitors arriving into Laurel from Interstate 59, it is necessary that the area become more attractive and inviting for as they cross this district into the Sawmill Overlay District then into the Downtown Laurel Overlay District.

## **507 SAWMILL OVERLAY DISTRICT**

### **507.01 General Description.**

The purpose of this overlay district is to protect the viability of the existing Sawmill Mall and complement Laurel's Downtown specialty retail offerings. It is a transition district between the interstate retail development of the Leontyne Price District to the Southwest and Laurel's Workplace, dining and specialty retail found Downtown. Expected Uses for this planning area are similar to Downtown Laurel with lot lines being broadened to allow wide sidewalks in front of buildings that can be used for outdoor eating and amenities. This area is centered on the Sawmill Square Mall and transitions to 16<sup>th</sup> Avenue on the West side, Downtown to the North, and towards Interstate 59 to the East via Central Avenue and Leontyne Price Blvd. to the South. Building front setback lines in new development or redevelopment should not exceed 20 feet, bringing buildings closer to the road with limited or no parking in the front. Out parcel development at the Sawmill Square Mall is encouraged to face either Sawmill Rd., Leontyne Price Blvd or Mason St. This will make this district appear more vibrant by filling in gaps in the built environment and more attractive to tourists entering Laurel from the Interstate via Leontyne Price Blvd. Buildings in this district are expected to be less diverse in size, shape and orientation from the Leontyne Price Overlay District but more

diverse but complementary to the existing built environment in Downtown Laurel.

## **507.02 Purpose and Intent**

### 507.02.01 Findings:

A. The provisions of this part are based on the following findings:

1. This area is underdeveloped with outdated building stock and is ripe for Neighborhood Center commercial redevelopment.
2. Establishing the Sawmill Overlay District gives Laurel the opportunity to reestablish the district as a historic, revitalized, retail hub for Jones County and the region.

B. Since the reconfiguration of the exit ramp of Interstate 59 and Beacon St, now Leontyne Price Blvd., the Sawmill Overlay District has the chance to continue the commercial corridor beginning at Leontyne Price Blvd. at I-59 and direct visitors to Sawmill Square Mall and Downtown.

The contact person must have the authority and ability to make immediate modifications to the displays and lighting levels when the need arises.

Should the governing authority and/or MDOT (where applicable) determine that the sign or any display or effect of the sign causes glare or in any way impairs the vision of the driver of any motor vehicle or that the display otherwise interferes with the operation of a motor vehicle, then upon request the owner of the sign shall immediately reduce lighting intensity of the sign to an acceptable level. “Immediately” in this context shall mean that the owner shall promptly and diligently begin and complete modifications as soon as he/she is advised of the problem. Each sign must appropriately, automatically, and individually adjust display brightness to conform with applicable brightness specifications as ambient light levels change at each such sign location due to sunrise, sunset, prevailing weather conditions, or otherwise.

existing or approved tower cannot be reinforced, modified, or replaced to accommodate planned or equivalent equipment at a reasonable cost.

- (D) The applicant's proposed antenna would cause electromagnetic interference with the antenna on the existing towers or structures, or the antenna on the existing towers or structures would cause interference with the applicant's proposed antenna.
- (E) The fees or costs required to share an existing tower or structure or to adapt an existing tower or structure for sharing are unreasonable. Costs exceeding new tower construction are presumed unreasonable.

**803.07.01 System to Examine Conditional Use Applications**

- A. In addition to zoning procedures and requirements relating generally to issuance

---

number "803.05.05". This editor took the liberty of correcting the same in Appendix I, Zoning Ordinance.

of building permits and certificates of occupancy/zoning compliance, a Conditional Use system is hereby established. It is intended that this system shall assure special examination, review, and findings by the Commission and appropriate agents, agencies or bodies in connection with proposed actions particularly specified in this Ordinance.

- B. Conditional Use procedures and standards as set forth herein are intended to apply in relation to use, occupancy, location, construction, design, character, scale, manner of operation, or necessity for making complex or unusual determinations, and to assure consideration of the particular circumstances of each case and the establishment of such conditions and safeguards as are reasonably necessary for protection of the public interest generally, of adjacent properties, of the neighborhood, and of the jurisdiction as a whole.
- C. For the purposes of this Ordinance, the term “requirements” refers to the restrictions which apply to all uses in a district, whether permitted as of right or only through a Conditional Use. They apply automatically to all uses in a zone. “Standards” are the guidelines for use by administrators in making decisions such as for rezoning or variances. They involve the application of stated criteria to given situations. “Conditions” are additional restrictions beyond the stated standards, applied to a particular use, which might govern, for example, hours of operation or the location of exits and entrances or the type of screening. A violation of the conditions is a violation of the Ordinance. The above distinctions help to define the way discretion is to be exercised in making the provisions of this Ordinance flexible to meet the needs of different situations in particular locations.
- D. The Commission will consider the specific recommendations of the Superintendent of Inspection considering conditions for said Conditional Use
- E. A public hearing (after required notice under this Ordinance) shall be held. At said hearing, any party may appear in person or by agent or attorney. The Commission must make their decision within a reasonable time thereafter, not to exceed 30 days.
- F. After receiving recommendations from the Superintendent of Inspection and before granting any special permit the Commission must make written findings that it is empowered under specified sections of this Ordinance to grant the Conditional Use and that the granting of the Conditional Use will not adversely affect the public interest.
- G. In the event that opposing interests cannot be resolved, the Commission shall find that balancing the interest of the City in preserving the Comprehensive Plan or the interests of nearby properties against the interest of the petitioner in using his property as proposed to be used, the granting of the Conditional Use Permit is required by considerations of justice and equity.
- H. After completing their reviews, the Commission will forward the application and their recommendations to the City Council
- I. If the Conditional Use application is denied, the applicant shall receive written notice of the specific grounds for the denial.

## **803.07.02 Purposes of Conditional Use**

- A. The development and implementation of this Zoning Ordinance is based upon the division of the community into districts within which the use of land and buildings and the bulk and location and structures in relation to the land are substantially uniform. It is recognized, however, that there are certain uses which because of their unique characteristics or nature require special and intensive review to determine whether they should be permitted in a specific location/district.
- B. These Conditional Uses also require review based upon standards and the application of special conditions and safeguards if permission is granted in such locations. Conditional Use procedures and standards as provided herein are intended to assure that such review is made and that appropriate conditions and safeguards are attached. Conditional Use procedures and standards shall be applied. Conditional Uses may be granted only in cases specified in this Ordinance.
- C. Conditions may be required for specified uses which must satisfy standards in addition to those generally applicable in a zoning district to eliminate or minimize the potentially harmful characteristics or impact of such Conditional Uses on the character of the zoning district in which they will be located.
- D. No conditions shall be imposed on the Conditional Use that will result in these standards making it unreasonably difficult to develop said Conditional Use.

- E. The establishment and maintenance of the Conditional Use is not detrimental to the public health, safety, or general welfare and that the

Conditional Use with specific limitations and design features as may have been required will further the aims of the Comprehensive Plan and will not be unduly detrimental to nearby properties.

- F. The Conditional Use as located, designed, maintained, and operated will be compatible with the existing or intended character of that zoning district.
- G. The Conditional Use does not depreciate property values.
- H. The Conditional Use is not hazardous, detrimental or disturbing to present surrounding land uses due to noise, glare, smoke, dust, odor, fumes, water pollution, erosion, vibration, general unsightliness, electrical interference, or other nuisance.
